Greetings Professor Hendricks,

My name is Jhovanny Uribe and I'm a Senior student at UCSC majoring in Computer Engineering! I wanted to reach out to you today about an inquiry I had surrounding a project I am presently working on for my Senior Design Project capstone course. I was graciously referred to you by my good friend Genesis Peñaloza who majored in BME at UCSC and suggested I reach out to you for feedback on my project!

My project aims to implement a design very reminiscent of prosthetic design in conjunction with robotic components and programming. I was advised that you have extensive experience in assisted motor technology and, as such, I would greatly appreciate any insight or feedback you could provide!

Would you happen to have any office hours I could consult for an opportunity to talk to you? I'd greatly appreciate your time and consideration. I hope to hear from you soon!

Best,  
Jhovanny

Hi Jhovanny,

Thank you for reaching out. I would be very happy to talk to you about prosthetics and assistive technology.

My office hours are Thursdays 3-5 pm in my office JBE 257C. (If i'm not there, check the teaching lab JBE 301B.)

I look forward to hearing from you. And please say hi to Genesis for me! :)

Best,

Dianne
